

I-205 Abernethy Bridge Project

Construction on the Abernethy Bridge is currently underway and will be completed in 2025. The updated bridge will be the first earthquake ready interstate bridge across the Willamette River in the Portland area. When combined with improved ramps adjacent to the bridge at OR 99E and OR 43, this project represents ODOT's largest construction project in over 45 years.

Improvements Include

- Earthquake-ready improvements to the Abernethy Bridge.
- Replacing the I-205 northbound on-ramp from OR 43 with a roundabout.
- Reconfiguring the on- and off-ramps at OR 99E.
- Improvements for people who walk, bike and roll on OR 43, Clackamette Drive and OR 99E.
- Installing a sound wall near I-205 southbound Exit 9.

Construction Impacts

- Periodic overnight lane closures on I-205 northbound and southbound.
- Periodic on- and off-ramp closures at OR 43 and OR 99E with signed detours.
- Two full weekend closures of I-205 in both directions in 2025.
- On- and off-ramp vehicle lane width restrictions.
- Noise, including pile driving, through mid-October 2023.
- Jon Storm Park parking lot will be closed during construction.

Project Updates

With toll revenue delayed to 2026 and project costs increasing, the second phase of construction for I-205 Improvements has been indefinitely postponed. The second phase included adding a third lane and seismic improvements to several bridges along the corridor. Pending environmental review and federal approval, the I-205 Toll Project is anticipated to begin in 2026 at the Abernethy Bridge to help repay a portion of the project costs.
